## AQUA-QUIP NEW LED RELEASE (WHITE & BLUE ONLY)

Code

Description

RAINBOW POOL PRODUCTS PTY LTD

## INSTALLING AN AQUA-STAR FIXED COLOUR LED UPGRADE KIT

1) Remove black nut from pool light body. Remove MR16 Halogen lamp.

2) Pull male spades from the female spades. Long nose pliers may be necessary.

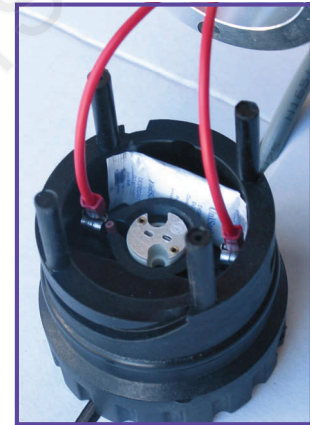

3) Try to completely remove the ceramic lamp holder by pulling out.

4) If it is firmly stuck, then leave the ceramic lamp holder in place and simply cut the wires off.

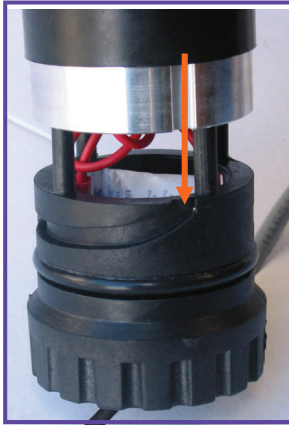

5) Use a 2mm drill bit to drill a hole in two posts as shown.

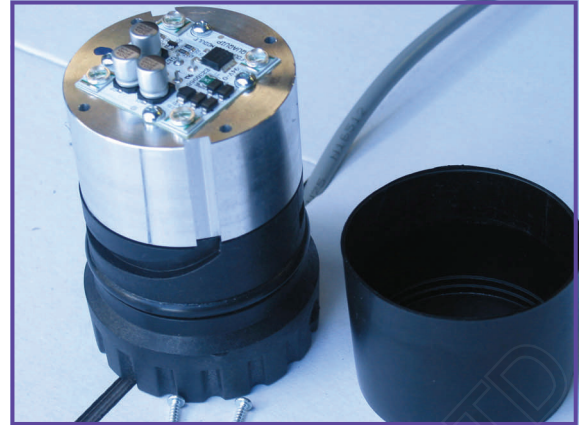

6) Connect wires from LED into female spades. Insert the absorption satchel

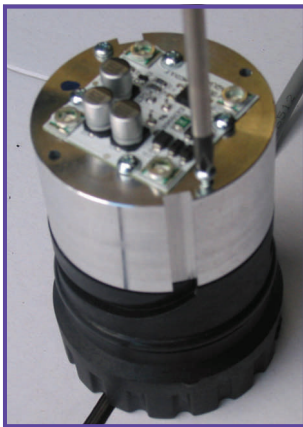

RAINBOW POOL SUPPLIES

7) Holes in heat sink fit over the 4 black posts. Align the slot in the aluminium heat sink with the bayonet guide in the black nut. Gently push led array down.

8) Remove black protective cap. Do not touch the aluminium heat sink or the LED array.

9) Use 2 screws provided to secure the heat sink to the post. The re-fit the black nut into the pool light body.
