**BCN03 Float Line Roller**

BCN03 Float Line Roller

# SPECIFICATIONS

## BCN03 Float Line Roller

A new trolley designed to transport and store the BCN03 Float Line after use in the swimming pool. Easy to use and aesthetically discreet. The BCN03 float line roller is manufactured using AISI-316 Stainless Steel and includes a PVC bag for collecting excess water from the float lines. Thanks to the bag's bottom outlets, it is emptied in a controlled manner with no water spillage.

The trolley has four castor wheels for maximum mobility. Two of these fitted with a brake. It can store a float line up to 50m long (or 2 of 25) and can be used for all float line models.
