## Max 4WD Robotic Cleaners

- ✓ **Perfect match for energy efficient variable speed pumps**
- ✓ **Inbuilt filtration to 2 microns**
- ✓ **Saves water**
- ✓ **Reduces power consumption**
- ✓ **Floor only or floor and wall climbing**

**Max 3 Robotic Cleaner**

**Max 5 Robotic Cleaner**

## Max Robotic Cleaners

Robot Pool Cleaners make perfect sense in today's energy efficient world. And the Max series pool cleaner is the latest revolution in cleaning technology. 4WD propulsion ensures the cleaner navigates the most difficult pools, while the high speed brush scrubs the pool surface. The self contained inbuilt filters collect large debris and small down to 2 micron, reducing the load on your conventional filter, reducing backwash frequency and saving expensive chemicals and water top up. And energy costs for your cleaning system are reduced to as little as \$10.00 per year.

The Max Series Robot Pool Cleaners incorporate the Smart Electronic Swivel System to reduce the chance of lead tangling. Designed by some of Europe's best design houses, it looks smart and is easy to use. The easy to remove filter cartridges are simple to clean, and enable easy viewing of the collected debris, even during operation.

### EASY INSTALLATION

Simple instructions then plug and play

### ELECTRONIC SWIVEL

Electronic swivel system to limit cable tangling

### LIGHT

Light weight with large drain outlets that enable fast discharge of water means the Max is easy to take out of the pool

### MAX SCRUBBER

Fast moving brush scrubs the pool and helps remove debris

And when not in use, its simple to remove and stow the Max so that your pool is ready to use at any time without swimming around cumbersome pool cleaner hoses. The Max is so efficient at cleaning it will only need to be operated once or twice a week in most swimming pools.

The Max 3 and Max 5 Cleaners allow you to optimize the use of your variable speed energy efficient pump because they operate totally independently of the filtration system. This allows your energy efficient pump to operate at the lowest speed without having to drive a suction cleaner which uses more energy.

The Max 3 is designed for floor cleaning but for the ultimate pool clean the Max 5 cleans both the floor and wall and is available with PVC wheels for pebble and colour quartz pools and PVA wheels for fully tiled pools.

**EASY-VIEW**  
Transparent windows for seeing the level of dirt in the filter even when it is working

**EASY CLEAN**  
With a filter that enables quick and easy cleaning without coming into contact with the dirt

**EASY OPEN**  
Direct access to the filter by just lifting the handle. No need to open the covers, turn the cleaner upside down or press any buttons

**4WD**  
4WD helps navigate difficult pools and obstacles such as suction and main drains

**FLOOR & WALL**  
Cleans the floor and the wall of the pool (only available for Max5)
