SPECIFICATIONS

Interface Modules

Description:

Chlorinator Interface Module Module that turns Non- Hurlcon model Chlorinators on and off when controller switch's between Pool and Spa.

Description:

Cleaner Interface Module will turn on and off Aux 3 when system is in Spa Mode. Ideal for turning off Infloor cleaning pumps when Spa is in use.

Description:

Swimjet Pump Interface module converts 2 x 10amp outlets into 2 x 15 amp outlets for Swimjet pumps using external 30am power supply.

Description:

Single Channel Dual Outlet Extension Box is required when two pumps are to operate from the same power outlet. The auxiliary pump plugged into this module obtains its power supply from an independent 10 amp power supply.

Description:

Multiple Valve interface will operate up to 3 valves per Outlet (Max two per system)
