# Naturally Clear Water

## The PWP2 Ionic Purifier

The PWP2 is a swimming pool, spa and pond controller that controls the filter pump run times and current output to the copper and silver alloy electrodes.

The clock can be set to run for single or dual run times per day and will remember times if the power is switched off for a period of 10 days.

### How it works

The PWP2 applies a small controlled current to a pair of electrodes made of a silver / copper alloy. These electrodes are set apart from one another in a cell fitted after the pool filtration.

Electrolysis occurs as the water passes over the energised electrodes producing natural silver and copper mineral ions. The silver ions attack bacteria in the water and the copper ions inhibit the growth of algae.

### Product Features

Manual Pump over-ride for filter back-washing

Designed & Manufactured in Australia

APVMA Approval #61279

Multi-function pump Time-Clock

Extra low voltage

Reduces skin irritation and stinging eyes

Simple electrode replacement

Not affected by heat

Ions active timer

Digital current control

Not affected by bather load

Saltwater compatible

Long Life Copper/Silver Anodes - 870gms

Low energy consumption

Clear View Cell Housing with 40 & 50mm Barrel Unions

Chlorine minimum level [1ppm] required

3 year warranty
