

SK1000 SKIMMER

SKIMMER FOR ABOVE GROUND POOLS

Featured Highlights

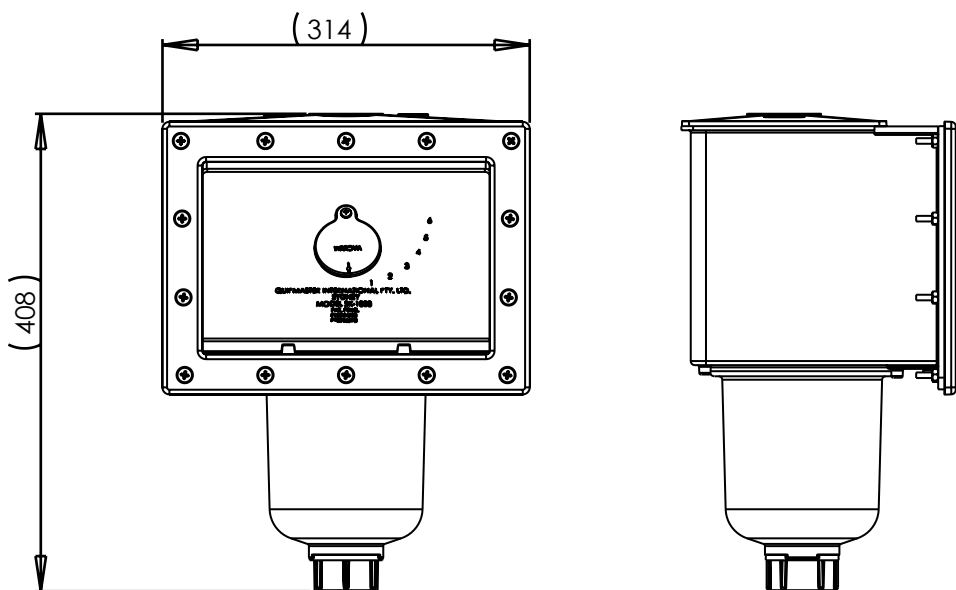

- Direct replacement for thousands of skimmers sold and installed through Australia.
- Combination weir door and vacuum plate.
- Compliant to AS1926.3 when installed on an above ground pool with an auxiliary outlet complying with AS1926.3 (6.1.2b).

SK1000 provides through-the-wall skimming capacity and efficiency. It comprises only four basic parts; skimmer body, floating weir, deck lid and leaf basket. Pentair's SK1000 skimmer introduced a unique design feature to the swimming pool industry, the 'Weir-Vac', as special method by which the floating wier also doubles as a vacuum plate.
