

AQUASTAR

Automated Multiport Valve

Aquastar provides automated backwashing and rinsing, triggered by a pressure sensor, timer, or both. The controller switches off the filter's pump prior to each repositioning of the multiport valve, ensuring safe operation.

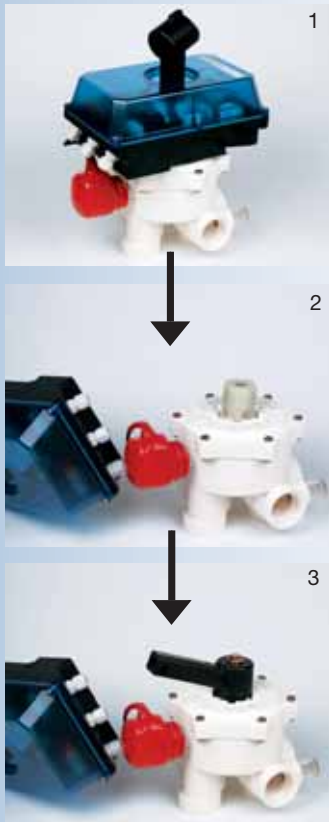

- Clear display of valve position
- Quiet operation
- Quick conversion from automatic to manual operation*
- Emergency handgrip integrated in the actuator
- IP65 protection
- Side and top mount configurations

AQUASTAR Automated Multiport Valve

AQUA STAR can be quickly converted from automatic to manual operation in case of an emergency.

Easy mounting and dismantling of AQUA STAR without any additional tools:

Technical Dimensions
