

Description:

Hydraulic chair lift. Frame made mainly in stainless steel AISI-316 with a central hydraulic mechanism and seat, provided with also a ladder for the assistant. For correct hydraulic operation a minimum 3.5Kg/cm² water supply pressure is required.

Ordering:

The external fixings are 2 metal anchoring fixtures (supplied with the unit) and the 2 internal fixings are adjustable which allows the height to be altered for different types of swimming pool surround. For pool depths below 1.4 m please inquire.
