

WATERLIFT

Made of Stainless Steel AISI-316 and injected plastic parts. It helps users to access the pool. With the Waterlift, going “in” and “out” has never been so easy. Comfort and quality added to your pool. Very easy to use and maintain. Automatic lifting device, driven by a 24 V CC single phase motor reducer. IP-67 isolation for all the electrical and electronic components. The different components are controlled by an electronic plate. The system is operated by two push-button (up and down) placed on the rail. Ergonomic and functional design.
