

CHEMIGEM

All you need to help maintain clear, healthy water... Automatically

CHEMIGEM

CHEMIGEM DOMESTIC CONTROLLERS

Automatic water management systems

Due to improvements the appearance and technical specifications may change.

Model: ChemigemD10 Water Management System

Code: 00112001

Description: Chlorine and pH controller suitable for most pools, with built-in pool circulation pump timer. Supplied with solenoid valves.

Model: ChemigemD10VP Water Management System

Code: 00112002

Description: Chlorine and pH controller to operate salt chlorinator for chlorine, with pH controlled with acid fed by suction solenoid valve.

Model: ChemigemD10pH Water Management System

Code: 00112003

Description: pH Controller only with acid fed by suction solenoid valve.

Model: ChemigemD10CL Water Management System

Code: 00112004

Description: Chlorine only controller with chlorine fed by suction solenoid valve.

Model: ChemigemD10P Water Management System

Code: 00112005

Description: Chlorine and pH controller suitable for most pools, with built-in pool circulation pump timer. Supplied with 12V peristaltic pumps with pressure limit of 40kPa.

Model: ChemigemD10V E Water Management System

Code: 00112006

Description: Controller for chlorine and pH, with chlorine fed via a 12V pressure operated solenoid valve for an erosion feeder and acid fed by a suction solenoid valve.

Model: ChemigemD10PP Water Management System

Code: 00112007

Description: Chlorine and pH controller dosing via two Pool Controls metering pulse pumps (pumps sold separately).

Chemigem and Saltigem working together to provide a complete solution to salt water pool management.

CHEMIGEM & SALTIGEM

If you enjoy a salt water pool – now you can have the best of both worlds with Chemigem and Saltigem working together to provide a complete solution to salt water pool management.

The **Chemigem D10 VP** Water Management System is specially configured to allow a Chemigem to control your Saltigem – (or other brand salt water chlorinator).

It's ideal for use on swimming pool and spa combinations – particularly in semi-commercial applications.

Simple to use – just plug your Saltigem into the Chemigem D10 VP and the Chemigem will control your chlorinator to ensure that chlorine levels are maintained at your pre-set levels.

The Chemigem D10 also measures and controls pH levels automatically – greatly increasing the efficiency of your Saltigem.

Installing a Chemigem D10 VP Water Management System will ensure that chlorine levels do not peak too high. This will protect your pool blanket.

The Chemigem D10 VP Water Management System is compatible with chlorinators utilising mineral salts (such as Magnesium Chloride).

Chemigem and Saltigem are proudly made in Australia and are backed up by a 2 year warranty and a national Service team.
