Aquasun 3 Digital Solar Controllers

The Aquasun 3 – technologically advanced and simple to use.

AQUASUN 3

Dontek solar controllers warm your pool by accurately controlling the delivery of cooler pool water to your heated roof collector. We want you to have the ultimate swimming experience.

A clock function can be enabled which allows solar start and end times to be selected. This eliminates nuisance early morning starts and provides the ability to select off peak power only run times.

THE AQUASUN 3CD

The *Aquasun 3CD* is the ideal choice for boosted systems, where the filter pump needs to be running before the solar pump is allowed to start.

The filter pump is simply plugged in to the *Aquasun 3CD*, which detects that the filter pump is turned on. It then allows the solar pump to start if required.

The *Aquasun 3CD* provides no complicated wiring, offers a simple setup, and avoids the overloading of chlorinators and timers.

THE AQUASUN 3 REMOTES

For an efficient heating system, the solar controller needs to know the accurate roof temperature. Dontek Electronics has a remote range which simplifies new installations and eliminates the need to find damaged wiring when upgrading or servicing.

Aquasun 3RP
with solar power

Aquasun 3RB
with battery power

Product Features

Simple Up, Down and Select Button
Easy to use – Set and Forget

Built in Clock with Battery Backup
Allows the system to learn and store information even during power failure

Auto Sampling
Ensures your pool is getting maximum heat gain

Heavy Duty Omron Contacts
Long Life pump switching

Surge protection
Now surge protected with built-in fuse

Large LCD Module
Easy to read, even in direct sun light

Marine Grade UV Sensor Cable
Long life even in the harshest conditions

Winter Mode
Assists in pool maintenance during off season – Saves Energy & Equipment

Tropical Mode
Helps cool overheated pools and swim spas

Digital Thermostats
Highest controller accuracy and unequalled reliability – calibration free

Self-Diagnostic Program
Technical feedback if required

Australian Made – from start to finish
Local employment and knowledge of service

Anti-Freeze
Protects your system from freezing if selected

3 Year Warranty
Peace of mind that your controller and sensors will go the distance.
