SPECIFICATIONS

The MDC50, in combination with complete injection, mixing and degas represents the latest advancements in ozone.

MDV (Mixing Degas Vessel) effectively reduces ozone off-gas via injection, mixing, de-gas, and ozone destruct (ozone off-gas is trapped and easily destroyed by the destruct cartridge) The MDV also includes a built in Venturi Injector.

Model: MDC 50

220 - 240 VAC 50 - 60 Hz

5 WATTS
