

Waterco Check Valve

Simple to install, inspect and service

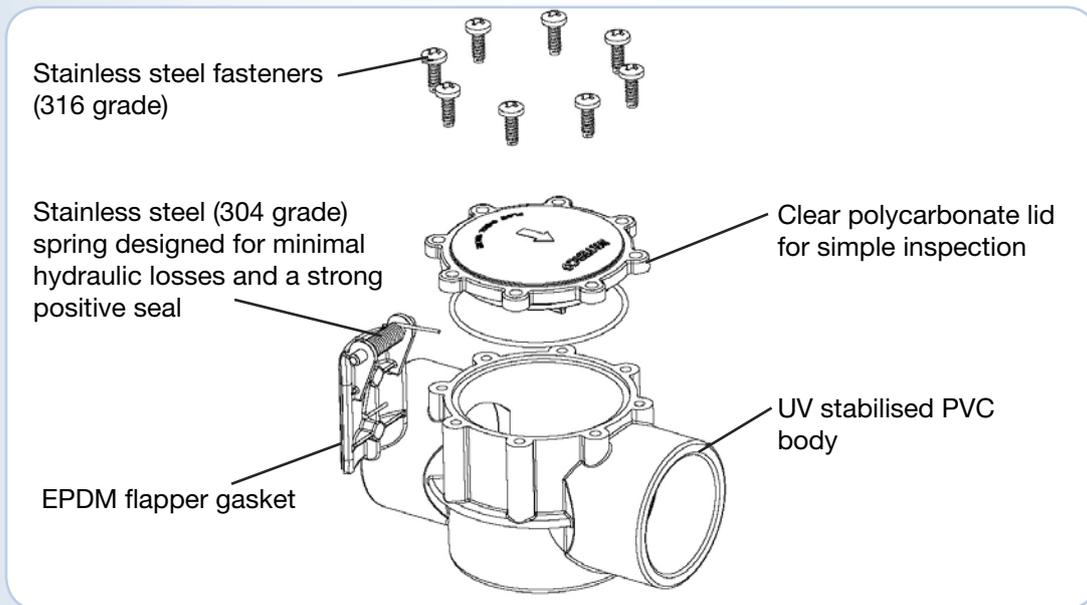

Waterco's Flow Check valves have been designed to be simple to install, inspect and service. With a 304 grade stainless steel spring designed for minimal hydraulic losses and a stronger positive seal, it is ideal for both inlet and return lines.

- Eliminate the loss of prime on the suction side of a pump.
- Prevent the drain down of water towards pumps and filters.
- Prevent water flow in an unwanted direction.

Waterco 90 degree and 180 degree Flow Check Valve

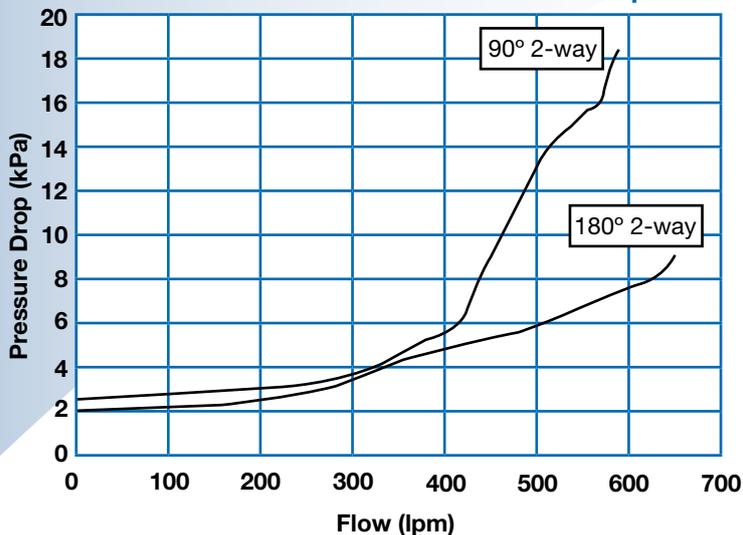

Waterco's Check Valve has been designed to be simple to install, inspect and service. With a 304 grade stainless steel spring designed for minimal hydraulic losses and a stronger positive seal, it is ideal for both inlet and return lines.

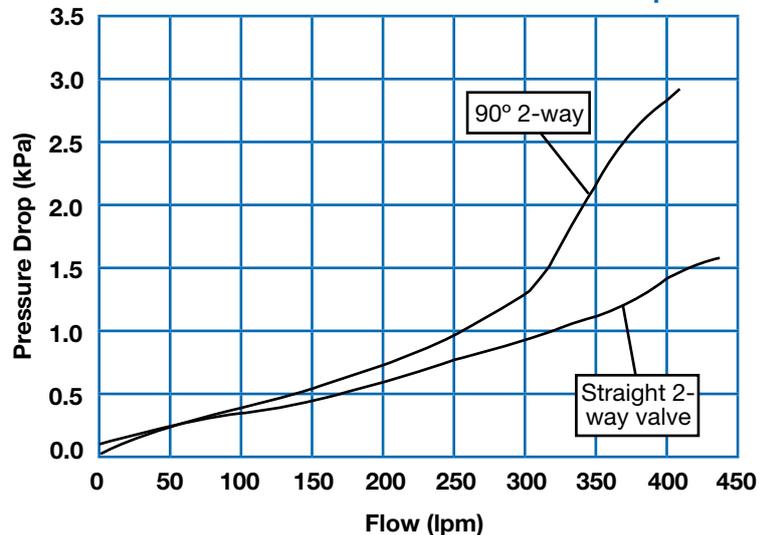

The Flow Check valve's pressure rating of 400 kPa (58 psi) and its 316 stainless steel fasteners make it suitable for domestic and commercial applications.
